# **Lph Cleaner (VC-20)**

## **Areas of Application:**

### Applicable on all waterproof surfaces:

- Sanitary area
- Kitchen area
- Lime residues
- Water stains
- Soap residues

BIOTENSIDON Lph Cleaner is ideal for using in the sanitary and kitchen area. It can easily remove lime residues, soap residues and water stains. The surfactants used in the cleaner are readily biodegradable and, therefore, environmentally sound. Lph cleaner is applicable on all waterproof surfaces. It is, however, not suitable for acid-sensitive materials, such as zinc, marble and some natural stones.

### **Application:**

Spray the cleaner undiluted, let it sit, rinse with water or wipe with dry cloth. For cleaning massive surfaces, mix the cleaner with water on 1:50 ratio.

Spray BIOTENSIDON Vinegar Cleaner onto the problem areas, and use a brush or sponge, then rinse off with clean water or wipe off with dry cloth.

The use with warm water will increase the cleaning effect and shorten the exposure time.

#### **Ingredients:**

Acetic acid (INCI), alcohols, C12-14, ethoxylated (7 EO)

### **Precautions:**

Keep BIOTENSIDON-Vinegar-Cleaner out of reach of child. Avoid contact with eyes. In case of contact with eyes, rinse out with clear water immediately and see a doctor. If swallowed, seek medical advice. Keep in the frost-resisting area.

#### **Ecology**

The product and the detergent raw materials used (surfactants) comply with the legal requirements in terms of biological degradability.
